

NOTICE OF PROPOSED SOLE SOURCE PROCUREMENT
this is not a competitive bid/proposal

The Utah Transit Authority (UTA) Procurement Policy provides that sole source procurements may be used only when the Award of a Contract is infeasible under other source selection methods, and at least one of the following circumstances applies: (a) The required goods or services are of a specialized nature requiring expertise that is only available from a single source; (b) The public exigency or emergency for the required goods or services will not permit a delay resulting from competitive solicitations; (c) After solicitations of a number of sources, competition is determined inadequate.

The UTA Purchasing Department has received a request to make the following sole source procurement:

Product and/or Service to be purchased: UTA Assetwise Phase 4 Enhancements

Contract Duration: 2 year time period

Proposed Sole Source Supplier: Bentley Systems Incorporated

Estimated Total: \$130,000.00

Sole Source Justification: UTA went through a competitive RFP process to procure and stand up a Track Analytical software program. Bentley's program was selected as the winner. UTA did not have enough funding to get all benefits of the software program. This phase 4 enhancement will allow UTA to integrate track geometry data gathered from its HyRail system with Optram to provide more analytical capabilities when analyzing the condition of UTA's rail infrastructure. Bentley owns the rights to the Optram program and is the only vendor capable of making these software enhancements in our system. This was a competitive bid process that was budget dependent. Bentley was selected as the winner and this project will allow UTA to further the development of the system that it selected through that competitive bid process.
